

Open Workshop

The Future of Hydrology - The Hydrology of the Future

Wednesday 9th July, 15:00-18:00

Site C, Sapporo Education and Culture Hall,
Seminar Room 302

Hydrologists have an important role in addressing the world's water problems, yet hydrology is often overlooked in the search for solutions. The IAHS (International Association of Hydrological Sciences) has established a working group of young hydrologists to identify possible and recommended directions for the field of hydrology over the next 20 years. The workshop aim is to present the intermediate report of the working group for feedback from the hydrological community.

Programme

15:00	Welcome Address <i>K. Takeuchi, President of IAHS</i>
15:05	Introductions <i>T Oki</i>
15:20	Reports on Hydrology 2020 meetings <i>K Heal, C Valeo, P Etchevers</i>
15:45	Intermediate Report The uniqueness of hydrology <i>S Uhlenbrook</i> The needs of society <i>J Balonishnikova</i> Advances in technology <i>S Franks</i> Critical bottlenecks <i>S Hubbard</i>
16:30	Break up into discussion groups
17:00	Report from each group and general discussions
17:45	Closing remarks <i>T Oki</i>
