

GEWEX Asian Monsoon Experiment (GAME)

Implementation Plan

March 1998

GAME International Science Panel

CONTENTS

1. FRAMEWORK OF GAME IMPLEMENTATION -----	1- 7
1.1 Introduction -----	1
1.2 Scientific Objectives -----	1
1.3 Strategy for GAME Implementation -----	2
1.4 Organization Framework of GAME -----	3
1.4.1 GAME International Science Panel (GAME-ISP)	
1.4.2 GAME International Project Office (GAME-IPO)	
1.4.3 National organization for GAME in Japan	
1.4.4 National organizations in other countries	
1.5 Time Phasing of GAME Implementation -----	6
1.6 Linkages to Other Related International Programs and Projects -----	7
2. OBSERVATION AND MONITORING -----	8- 21
2.1 GAME Satellite Remote Sensing Program -----	8
2.1.1 Scientific goals	
2.1.2 Program strategy	
2.2 GAME-Radiation Activity -----	10
2.2.1 Introduction	
2.2.2 A plan for the GAME-Radiation activity	
2.2.3 Surface radiation measurements	
2.2.4 Satellite remote sensing	
2.2.5 Implementation schedule	
2.2.6 Participating organizations	
2.2.7 Cooperative organizations	
2.3 Asian AWS Network (AAN) -----	16
2.3.1 Objectives	
2.3.2 Strategy of AAN	
2.3.3 Development of AWS	
2.3.4 Data requirements for AAN monitoring	
2.3.5 Coordination for AAN	
2.3.6 Data collection and control	
3. REGIONAL EXPERIMENTS - PROCESS STUDIES -----	22- 99
3.1 Objectives and Concept of GAME Regional Experiments -----	22
3.2 Tropical Region (GAME-Tropics) -----	24
3.2.1 Scientific background	
3.2.2 Experimental strategy	
3.2.3 Data collections	
3.2.4 Organization and coordination system of the experiment	

3.3	Subtropical Region (GAME-HUBEX) -----	48
3.3.1	Scientific goals	
3.3.2	Outline of HUBEX	
3.3.3	Strategy of HUBEX	
3.3.4	Intensive field observation	
3.3.5	Organization and coordination of HUBEX	
3.4	GAME/Tibet -----	66
3.4.1	Scientific goals	
3.4.2	Strategy of experiments	
3.4.3	Data policy	
3.4.4	Participating institutions	
3.5	Siberia Region (GAME-Siberia) -----	81
3.5.1	Scientific background for Siberia	
3.5.2	Study objectives	
3.5.3	Implementation details	
3.5.4	Cooperation with other international projects	
3.5.5	Promoting organization and list of contributing institutes	
4.	FOUR-DIMENSIONAL DATA ASSIMILATION (4DDA) AT JMA ----	100 – 103
4.1	Scientific Issues -----	100
4.2	The 4DDA System at JMA -----	100
4.3	Strategy of 4DDA -----	101
4.4	Data Archives -----	103
5.	NUMERICAL MODELLING -----	104 – 108
5.1	Scientific Objectives -----	104
5.2	Modelling of Large-scale Phenomena -----	104
5.2.1	Predictability of the Asian monsoon	
5.2.2	Interaction between ENSO, the Asian monsoon and the Eurasian snowfall	
5.2.3	Establishment of one-month prediction of the Asian monsoon	
5.2.4	Spring predictability barrier	
5.2.5	Validation for satellite data and its use for the large-scale modelling	
5.3	Modelling of Meso-scale Atmospheric Processes -----	106
5.4	Modelling of Basin-scale Hydrological Processes -----	108
6.	INTENSIVE OBSERVING PERIOD (IOP) -----	109 – 116
6.1	Objective of IOP -----	109
6.2	Structure of IOP -----	109
6.2.1	Radiosonde network	
6.2.2	In-situ observation network	
6.2.3	Satellite observations	
6.2.4	Time phasing of IOP	
6.3	Coordination of Enhanced Radiosonde Observation for IOP -----	112

7. GAME DATA MANAGEMENT -----	117 – 121
7.1 Overview of the Strategy -----	117
7.2 Guideline for Data Exchange and Dissemination -----	117
7.2.1 International data resource and institutional holding	
7.2.2 Participating institutes	
7.2.3 Utilization and transfer	
7.2.4 Data policy (time schedule)	
7.2.5 Retention	
7.2.6 Updating	
7.3 GAME Archive & Information Network (GAIN) -----	120
7.3.1 GAIN	
7.3.2 Structure	
7.4 Schedule for GAIN Initial System (GAIN-IS) -----	121
REFERENCES -----	122
LIST OF ACRONYMS -----	125
APPENDIX A	
GAME International Science Panel members (as of January, 1998) -----	129
APPENDIX B	
GAME International Project Office -----	134
APPENDIX C	
Summaries of GAME ISPs and Conference -----	135
