

HYUNGJUN KIM /hjʌŋ-dʒun kim/

Global Hydrologist

Specially Appointed Associate Professor
 Institute of Industrial Science & Dept. of Civil Engineering
 The University of Tokyo

Be607, 4-6-1 Komaba, Meguro-ku, Tokyo 153-8505, JAPAN
 +81-3-5452-6382
 hjkim@iis.u-tokyo.ac.jp

PROFESSIONAL PREPARATION:

- 2010 PhD in Civil Engineering, *The University of Tokyo, Tokyo, Japan*
 2004 MS in Atmospheric Sciences, *Yonsei University, Seoul, Korea*
 2001 BS in Atmospheric Sciences, *Yonsei University, Seoul, Korea*

APPOINTMENTS:

- 2017.07 – Present **Assoc. Project Scientist** (2019.07 –), **Assoc. Visiting Scholar** (2017.07 – 2019.06)
UCLA Joint Institute for Regional Earth System Science and Engineering, Los Angeles, USA
NASA Jet Propulsion Laboratory, Pasadena, CA, USA
- 2012.04 – Present **S. A. Associate Professor** (2017.04 –), **Assistant Professor** (2012.04 – 2017.03),
Institute of Industrial Science, The University of Tokyo, Tokyo, Japan
Dept. of Civil Engineering, The University of Tokyo, Tokyo, Japan
- 2010.10 – 2012.03 **Postdoctoral Scholar**, *UC Center for Hydrologic Modeling, University of California, Irvine, Irvine, CA, USA*
- 2011.01 – 2012.03 **Research Fellow**, *Institute of Industrial Science, The University of Tokyo, Tokyo, Japan*
- 2010.07 – 2010.09 **Researcher**, *Tokyo Institute of Technology, Tokyo, Japan*
- 2010.04 – 2010.06 **Project Researcher**, *Institute of Industrial Science, The University of Tokyo, Tokyo, Japan*

RESEARCH TOPICS:**Coupled Natural-Human Systems and Sustainable Development**

Investigating anthropogenic alteration on natural processes and the feedback to human society. Developing numerical schemes representing human activities in various sectors (e.g., water, agriculture and energy) for global physical models and assessing their impacts. Investigating renewable energy development (e.g., photovoltaics) and the impact on regional and global climate. Incorporating societal and economic approaches into a numerical modeling framework to provide quantitative guides and evidences for international initiatives such as UN Sustainable Development Goals.

Energy and Water Cycles, Climate Forcing and Land Feedback, and Extreme Events

Developing numerical schemes (e.g., flood inundation) and modeling framework for global scale hydrological simulations including development of a long-term (> 100-year) surface meteorology dataset. Quantifying energy-water balances and land-atmosphere interactions under climate changes. Investigating climate variabilities (e.g., El Niño) and their teleconnection patterns to regional hydrology and related disaster risks such as flood and drought. Estimating simulation uncertainty and constructing a benchmark environment.

Remote Sensing Hydrology and Big Data-Model Integration

Estimating uncertainty of radar and radiometer satellite precipitation remote sensing (e.g., TRMM and GPM) and developing a retrieval algorithm considering the physical conditions of the land and atmosphere. Detecting changes of freshwater availabilities using satellite gravimetry (e.g., GRACE). Monitoring surface water height using satellite altimetry (e.g., Jason and SWOT) and incorporating with deep-learning for short-lead (< 24-hour) river stage forecast. Developing big data (including satellite observation) I/O, analysis and assimilation framework.

PROFESSIONAL SERVICES, SYNERGISTIC ACTIVITIES & SCIENTIFIC OUTREACHES: (selected)**Global Soil Wetness Project Phase 3 (GSWP3), *Chair* (since 2014)**

One of core projects of GLASS/GEWEX as a liaison across broader science communities including ISI-MIP, LUMIP, CLIC/WCRP, GDAP/GEWEX, and CMIP6 (<http://hydro.iis.u-tokyo.ac.jp/GSWP3/>)

Land Surface, Snow and Soil-moisture Model Intercomparison Project (LS3MIP), *Co-chair* (since 2014)

A CMIP6-endorsed-MIP to provide a comprehensive assessment of land surface, snow and soil moisture feedbacks on climate variability and climate change, and to diagnose systematic biases in the land modules of current ESMs. (<http://www.climate-cryosphere.org/activities/targeted/ls3mip>)

Global Land Atmosphere System Study (GLASS), *Elected Panel Member* (since 2012)

A science panel member of Global Energy Water Exchanges Project (GEWEX), one of four core projects of World Climate Research Programme (WCRP) (<http://www.gewex.org/panels/global-landatmosphere-system-study-panel/glass-panel/>)

Today's Earth Global, *Advisory* (since 2012)

Global pseudo real-time simulation system of land surface, river discharge and flood area fraction co-developed by Japan Aerospace Exploration Agency/Earth Observation Research Center (JAXA/EORC), Remote Sensing Technology Center of Japan (RESTEC), and The University of Tokyo (<https://www.eorc.jaxa.jp/water/TE-global/>)

Precipitation Measurement Mission (PMM), *Science Team of JAXA* (since 2013), *Science Team of NASA* (2016-2019)

Japan-U.S. joint satellite mission of Global Precipitation Measurement/Dual-frequency Precipitation Radar (GPM/DPR) (<https://pmm.nasa.gov/>)

Surface Water and Ocean Topography (SWOT), *Science Team of NASA* (2016-2018)

French-U.S. joint satellite mission for global measurement of terrestrial and ocean water surface elevation (<https://swot.jpl.nasa.gov/>)

Gravity Recovery And Climate Experiment – Follow On (GRACE-FO), *Science Team of NASA* (since 2020)

Follow on mission of the GRACE, a Germany-U.S. joint satellite mission for continuing its legacy of tracking Earth's water movement across the planet (<https://gracefo.jpl.nasa.gov/>)

ExtremeX, *Participant* (since 2018)

Numerical experiments to disentangle the role of different climatological drivers for recent extreme events using multiple climate models constraining land surface states and/or atmospheric dynamics.

Soil Parameter Model Intercomparison Project (SP-MIP), *Primary Forcing Data Provider & Participant* (since 2018)

Controlled multi-model global offline experiments to investigate whether simulation spreads of water-balance variables (e.g., evapotranspiration, soil-moisture and runoff) depend on model structure or model parameters.

Half a degree Additional warming, Prognosis and Projected Impacts (HAPPI), *Collaborator* (since 2016), and **for Land (HAPPI-Land)**, *Contributor* (since 2017)

Multi-model super-ensemble based quantifications of relative risks of extremes under 1.5/2.0°C warming following the Paris Agreement (<http://www.happimip.org/>) and an extension of HAPPI project to estimate the impact of land use and land cover changes based on different land use scenarios.

African Monsoon Multidisciplinary Analysis (AMMA) Land surface Model Intercomparision Project Phase 2 (ALMIP2), *Working Group* (since 2013)

A project of GLASS/GEWEX to obtain a better understanding of the intra-seasonal and interannual variability of the west-African monsoon (http://www.umr-cnrm.fr/amma-moana/amma_surf/almip2)

Inter-Sectoral Impact Model Intercomparison Project (ISI-MIP), *Participant* (since 2011), *Primary Forcing Data Provider for the Phase 2* (2014-2016)

Climate-impacts modelling initiative to contribute to a quantitative and cross-sectoral impact assessments of climate change (<https://www.isimip.org/>)

GEWEX Asian Monsoon Experiment (GAME)-Tibet, *Field Campaign Participant* (2002), and **-Tropics**, *Field Campaign Participant* (2002-2003)

Setup eddy covariance tower flux measurements for intensive observation periods and long-term measurement over Tibetan Plateau (prairie) and Thailand (mixed forest)

Organizing committee of an inter-community international symposium of Hydrology delivers Earth System Science to Society (HESS) – 1st at Tsukuba, Japan, Feb., 2007; 2nd at Tokyo, Japan, Jun., 2010 (jointly with GSWP/GLASS, AsiaFlux/ FLUXNET, and LandFlux-Eval); 3rd at Seoul, Korea, Aug., 2013 (jointly with AsiaFlux annual meeting); 4th at Tokyo, May, 2017 (jointly with science communities across disciplines including GLASS/GEWEX, ILAMB and ISI-MIP) (<http://www.gewexevents.org/events/hesss4/>); 5th at Saskatoon, Canada, Jun., 2020 (planned), Land Modeling “LandMIP” Workshop at Zurich, Switzerland, Oct., 2015

(co-) **Convener** of *American Geophysical Union Fall Meeting* – Advances in large-scale modeling and remote sensing of climate-hydrology-human interactions toward sustainable land-water resource management (2018), Computational Methods and Tools for Model-Data Integration (2018), Progress in large-scale modeling and remote sensing of the water cycle toward better human water management (2017), Climate Extremes: Trends, Mechanisms, and Prediction (2015), Progress in Large-Scale Modeling and Remote Sensing of the Water Cycle in a Changing World (2015), Land Surface, Snow, and Soil moisture in Land-Climate Feedback and Model Diagnosis (2015); *Asia Oceania Geosciences Society* – At the Edge of Hydrology: Natural- and Human-induced Changes in Fluxes Across the Land-ocean and Land-atmosphere Interfaces with Impacts on Global and Regional Water Cycle (2018), Water Cycle in a Changing Climate from Observations and Model Simulations, and Implications for Water Resources (2014), Natural- and Human-Induced Changes and the Role of Groundwater in Terrestrial Water Cycle (2014), Global Change Impacts on Hydrological Cycle and Implications for Water Resources (2012); *GEWEX Science Conference* – Advances in Irrigation Hydrology and Irrigation Impact on Water Cycle: Measurements, Modeling, and Multi-Scale Impacts on Water Resources (2018)

Guest editor of a special collection of Hydrology in Earth System Science and Society (2011) – Journal of Hydrometeorology, AMS (<https://journals.ametsoc.org/topic/hesss>); Hydrology delivers Earth System Sciences Society 4 (2017) – Water Resources Research, AGU ([https://agupubs.onlinelibrary.wiley.com/doi/toc/10.1002/\(ISSN\)1944-7973.HESSS4](https://agupubs.onlinelibrary.wiley.com/doi/toc/10.1002/(ISSN)1944-7973.HESSS4)); Integrating Big Data with Earth System Models of Natural and Human Systems: Confronting Models with Observations to Constrain Emergent Behavior (2018) – Frontiers in Big Data (<https://www.frontiersin.org/research-topics/8457/integrating-big-data-with-earth-system-models-of-natural-and-human-systems-confronting-models-with-o>); Large-scale Modeling and Remote Sensing of Climate-Hydrology-Human Interactions (2019) – jointly in Atmosphere, Water and Remote Sensing, MDPI

JOURNAL PUBLICATIONS: (peer-reviewed; international)

h-index: 18 & 2544 citations for 52 publications @ Researcher ID (<http://bit.ly/hk-publons>)
 h-index: 21 & 2826 citations for 62 publications @ Scopus (<http://bit.ly/hk-scopus>)
 h-index: 21 & 4095 citations @ Google Scholar (<http://bit.ly/hk-google>)

AWARDS & HONORS:

Dec. 2018	Top authors, American Geophysical Union, AGU Fall Meeting 2018, Washington, D.C, United States
Dec. 2016	Performance Award (approx. top 5%) for Winter Semester of 2016, Institute of Industrial Science, The University of Tokyo, Tokyo, Japan
Aug. 2016	Bjerknes Visiting Fellow, Bjerknes Center for Climate Research, University of Bergen, Bergen, Norway
Dec. 2014	Performance Award (approx. top 5%) for Winter Semester of 2014, Institute of Industrial Science, The University of Tokyo, Tokyo, Japan
Nov. 2014	Minister's Award (Ministry of Ministry of Science, ICT and Future Planning, Republic of Korea), Big Contest 2014, Seoul, Korea
Sep. 2014	JSHWR Excellent Paper Award of Japan Society of Hydrology and Water Resources for a research paper entitled " <i>Global flood risk under climate change</i> ", Y. Hirabayashi et al., Japan,
Jun. 2014	Minister's Award (Ministry of Security and Public Administration, Republic of Korea), Datathon 2014, 1 st Data Day, Seoul, Korea
2009 – 2010	The University of Tokyo Fellowship, Tokyo, Japan
